

UV-C Dosimeters

Provide Visible Evidence of Successful Disinfection

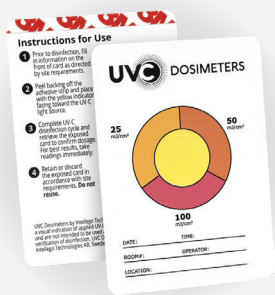

UV-C Dosimeters display how much germicidal ultraviolet (UV-C) exposure has been delivered to air and surfaces, in mJ/cm^2 . They provide valuable evidence of the disinfection process and validate the output of germicidal UV equipment.*

Assure™ UV-C Dosimeter

A portable, full-featured instrument that provides highly-accurate UV-C measurements in mJ/cm^2 . Sits upright, on back or side, and can be placed in supplied wall holder. Uses 1 AAA battery.

Item Number: 00-0376

UV-C Dosimeter Card

Contains a patented colorimetric indicator that changes color at 25, 50, and 100 mJ/cm^2 to visibly confirm that your direct germicidal ultraviolet fixture is achieving the desired UV-C exposure. Each card is designed for 1 treatment cycle and **CANNOT** be reused.

Item Number: 00-0373

RECOMMENDATIONS

- Use with direct germicidal UV fixtures** including Sanidyne®, Sani-Ray®, SaniLIGHT®, and Biolux®.
- Validate that surfaces and equipment have received the desired amount of UV-C to inactivate harmful pathogens.*
- Use with every disinfection cycle.
- Ideal for training staff, validating lamp output, and as an auditing tool.
- For use in hospitals/physician offices, commercial offices, homes, schools, gyms, hotels, restaurants, airports, trains, buses, casinos, grocery/retail stores, and more.

*Disclaimer: UV-C Dosimeters are intended as a visual reference of UV-C irradiation only and are not a substitute for microbiological testing to verify disinfection.

Our Direct Germicidal Ultraviolet Fixtures are for use in **UNOCCUPIED spaces or when proper precautions are taken.

Ensure Personnel Safety

Personal UV-C Exposure Indicators

These indicators change color to reveal the word "STOP" if personnel are exposed to an accumulated dose of 6 mJ/cm^2 of UV-C irradiation. Adhesive backing sticks to clothing. Available in packs of 10. Designed for single, daily use and **CANNOT** be reused.

Item Number: 00-0375
